SQL Injection Lab

Logging in with admin admin

Logging in as ted
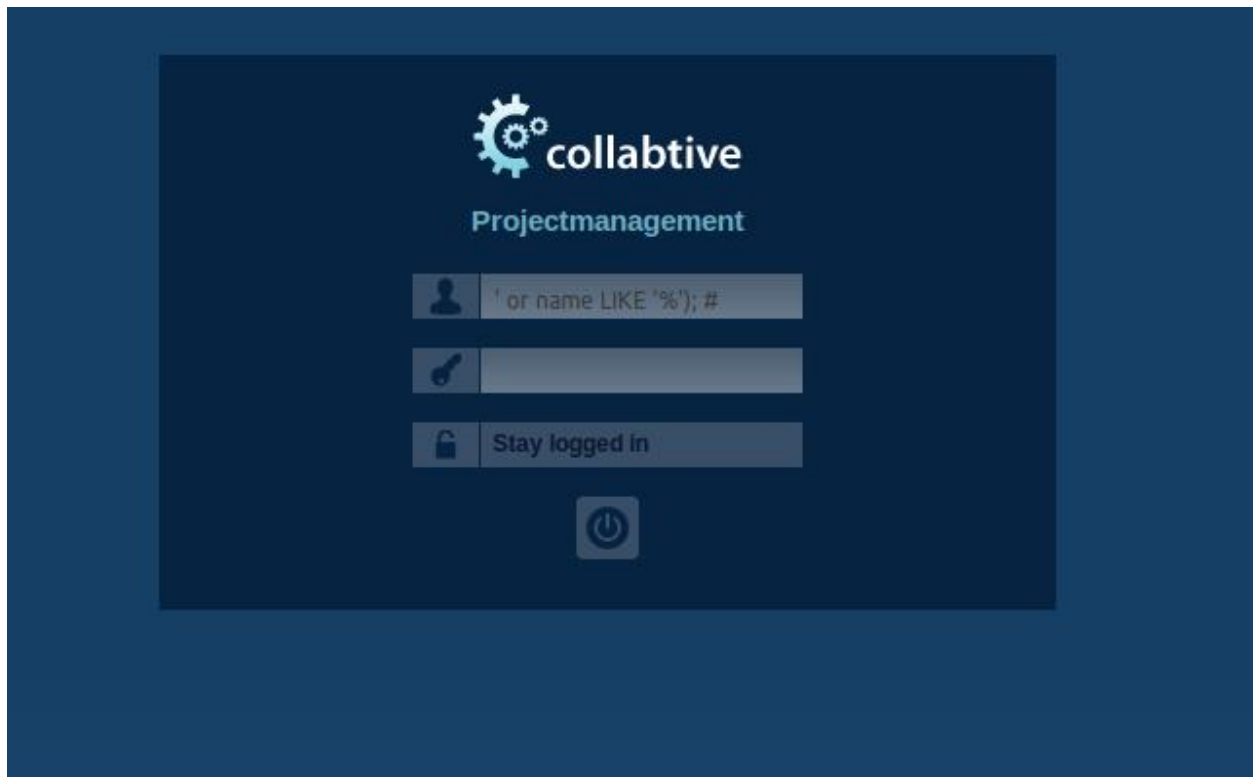

Loggin in as admin

Logging in with blank name

Failed on this attempt, trying something new

I took an sql class and learned about LIKE '%' so going to try

' or name LIKE '%'); #

Thinks I am the admin

What I learned, the ' lets the text field believe we are submitting a query and then we can insert any sql query

Usually looks like

SELECT #

FROM #

WHERE ? and we get to do the where part (insert code here)
